

Carbon Reduction Plan

Commitment to achieving Net Zero

TEKEVER Ltd is committed to achieving Net Zero emissions by **2050**. This CRP conforms to PPN 06/21.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2021	
Additional Details relating to the Baseline Emissions calculations.	
<i>This is our first year of actively baselining our carbon measurements. We have used historical data from 2021 to map our CRP</i>	
Baseline year emissions: 2021	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	6594.52
Scope 2	2082.48
Scope 3 (Included Sources)	3430
Total Emissions	12107

Current Emissions Reporting

Reporting Year: 2021	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	6594.52
Scope 2	2082.48
Scope 3 (Included Sources)	3430
Total Emissions	12107

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to **6000** tCO₂e by **2027**. This is a reduction of circa **50%**. We will achieve this by switching our lease vehicles to electric versions and also by providing our sales team with an electric vehicle.

We have applied an equity share proposal for Scope 2 as we currently rent office space for the business. This office space attracts a utility charge which we hope to see decrease due to the majority of colleagues working from home and also from the installation of solar energy panels.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been implemented since the **2021** baseline. The carbon emission reduction we hope to achieve by these schemes equate to **circa 6000** tCO₂e, a **50%** reduction against the **2021** baseline and the measures will be in effect when performing the contract

- Lease Electric vehicle for our sales team - reduction of circa 6000

In the future we hope to implement further measures such as:

- Increased engine efficiency for our platforms
- Increased awareness of electrical usage within the office environment
- Pooling of travel when moving between airport of departure and home base
- Continued education of effective recycling use
- Promotion of green sustainable travel methods such as cycle to work for those who can
- A rethink of our travel policy and the promotion of greener hotels will be encouraged

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standards for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the Managing Director.

Signed on behalf of the Supplier (TEKEVER Ltd):

Mr AP Pollington

Head of HR and Support Services, TEKEVER Ltd
